

Saturday, April 11 4:30 PM – 5:50 PM Plenary Session # 1
Grand Ballroom CD South, EF

Title: *STEM Vital Signs*

Presenter: Linda P. Rosen, CEO, Change the Equation

Description:

We stand at a critical moment in efforts to develop a globally competitive STEM workforce. Since the roots of that workforce lie in K-12 education, Change the Equation, a coalition of major companies, work collectively through their philanthropy and advocacy to ensure that all high school graduates are STEM literate. Decisions on which programs to fund and which policies to support are grounded in research to help ensure the greatest outcomes. Now in its fourth year of operation, CTEq is pleased to describe what's working and what needs attention.
